

# PS092 • PS106 • PS133 MOTORIZED SCREEN

IR REMOTE CONTROL INCLUDED FOR USE WITH UNIVERSAL REMOTES.

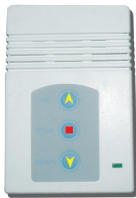

Both remotes are included

IR Remote

RF Remote

Wall mount control.  
Located at the right  
side of the screen

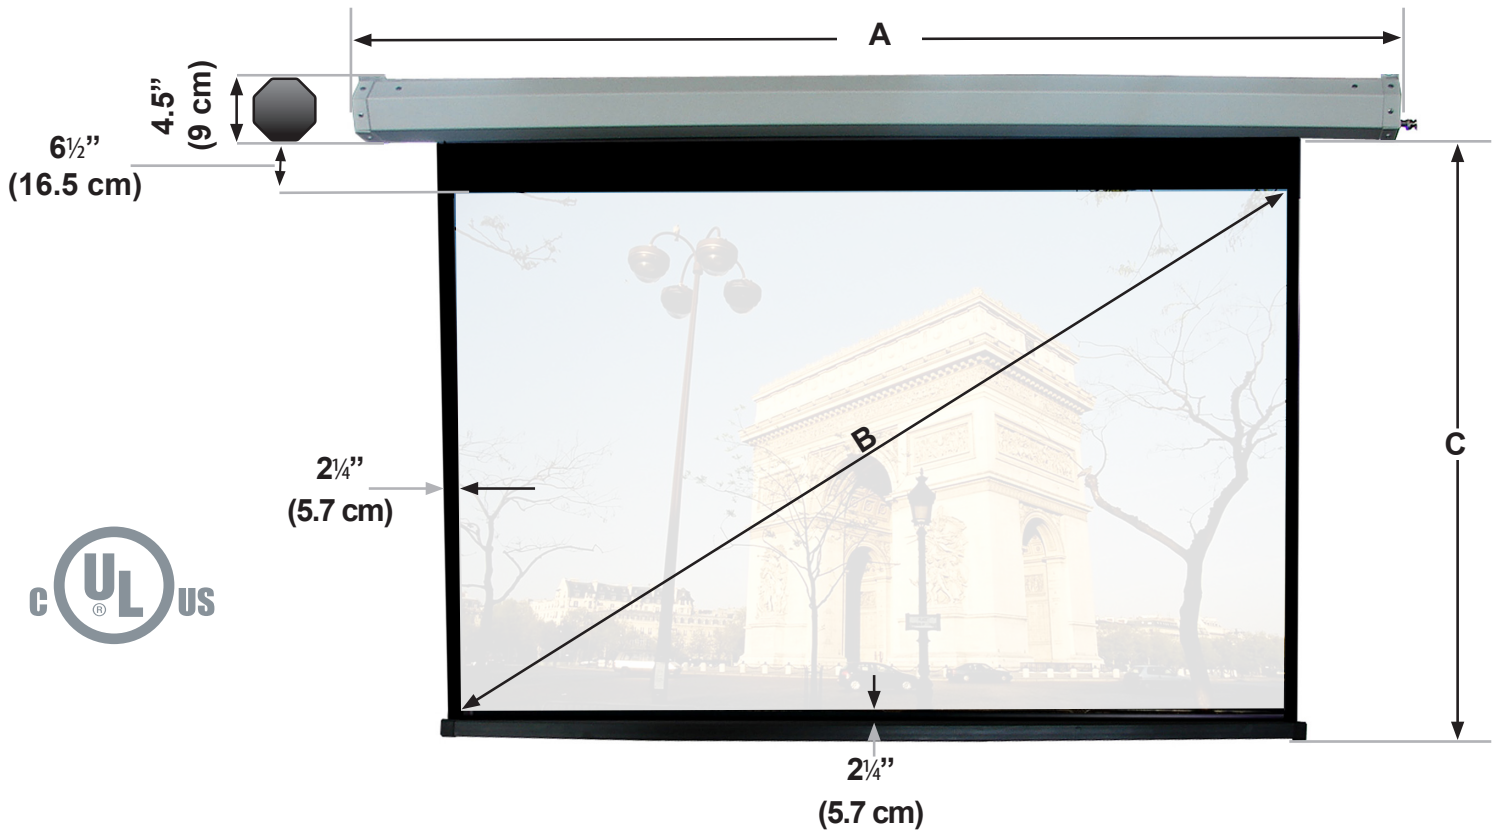

Daveco is pleased to introduce a new series of cUL, remote controlled, motorized powered screens. Three models ranging in size from 92 to 106 to 133 inches make up the series. To accommodate all types of installations, both FM and infrared remote controls are included with each model. Both remotes can even be used at the same time. All models are of a 16/9 aspect ratio and feature an extra wide top black band so that the screen can be set lower and remain esthetically appealing. Daveco's high quality screens are composed of Matte White polyester + PVC to display true and accurate colors, smooth imaging and wide angle uniform brightness. The under layer is a black coated PVC to inhibit light transfer. Each screen is coated with a flame retardant, is washable and is rated at a 1:0 gain ratio with a visual angle of 100 degrees.

Easy set-up is made possible by, included, wall and or ceiling brackets, a 24 foot long, detachable, power cord and a convenient three position in line control box.
