

MSE4X1

HDMI SWITCHER

As the HDMI standard becomes increasingly popular, connecting a greater number of HD components to your plasma or LCD display may become a problem. Maestro is pleased to introduce the MSE4X1 HDMI switcher to help you make the most of your system by connecting up to 4 components to a single HDMI input. The rugged metal casing is sleek and stylish and requires only the simple touch of a button to select between inputs. Furthermore, as a high performance unit, cables can be up to 10 meters long for each of the component inputs and for the TV output as well. This makes it easy to place the MSE4X1 wherever it fits best in your home theatre set up. Compatible with the latest High Definition standards and supporting digital audio, 36-bit deep color and full 1080p resolutions, the MSE4X1 is the next step in the evolution of MAESTRO HD, bringing refined definition to your multimedia experience.
