Conduit

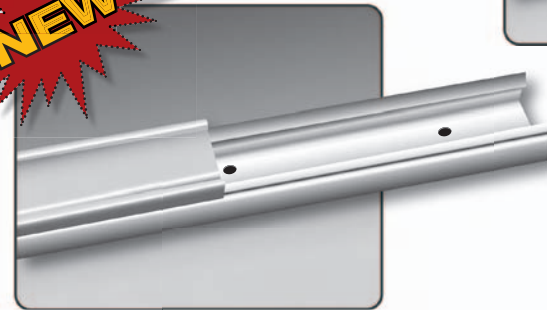

Omage is pleased to introduce an attractive and simple to use wire conduit series. Perfect for hiding unsightly wires, the **2m long** conduits are easy to cut, install and even paint if needed. Available in two sizes, a larger track of 20 mm by 35 mm and a smaller track of 15 mm by 20 mm will handle all jobs. Both models feature easy to peel adhesive tape and pre-drilled holes on the under side of each strip to ensure that it will stay in place even when fully loaded with wires. Furthermore, Omage conduits are designed with an easy to open and close lid so that wires can be added or removed without difficulty.
