

Granite Outdoor

Outdoors

OMAGE®

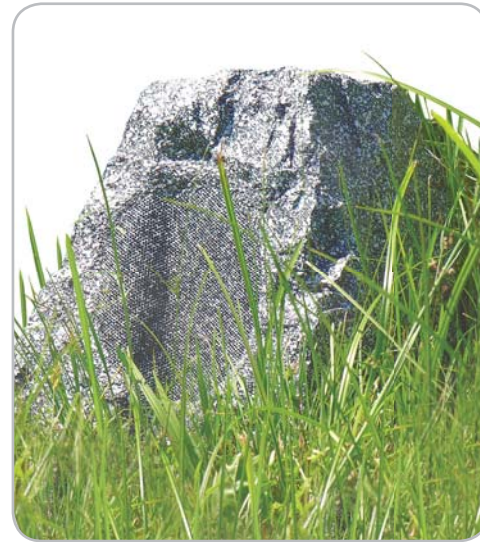

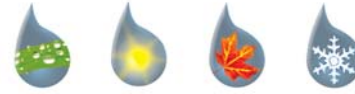

Love of the outdoors and great music was a key factor in developing the **GRANITE** rock speaker series. **GRANITE** rock speakers blend into the surrounding environment and give you the freedom to enjoy music in your yard, garden or swimming pool area.

Simplicity is the rule. Choose your favorite outdoor sites, bury the included 30-foot underground cable, attach it to your home stereo system and enjoy the sound of music wherever you want it.

GRANITE speakers are all two-way and are available with a 1" tweeter and either a 5", 6.5" or 8" rubber suspended woofer. Reliable and durable, all models are designed with a polyswitch tweeter overload-protection device and are constructed of resistant all-weather fiberglass polymers for four-season application.

The **OVC100-G** is a 100 watt, hermetically sealed, impedance-matched outdoor volume control. A convenient on-wall mounting design greatly facilitates installation when positioning on any exterior walls, eg; brick, stone, etc. For professional results, the heavy duty casing is equipped with a standard conduit port to make hiding unsightly wires easy.

Granite

GR150

Where great music is desired and discretion is a must, the **GR150** is the solution. When buried in the ground among flowers or shrubs, it becomes virtually invisible while delivering an impressive 360 degree performance.

Optional Accesories:

ACC102 - Weather-resistant, exterior stereo volume control, 70W.

ACC103 - 50 and 100 feet (15 m and 30 m) direct burial speaker cable extension.

ACC104 - 500 feet (150 m) direct burial; speaker cable extension.

OVC100-G - Weather-proof, impedance-matched exterior volume control, 100W.
