

The Omage **SP200** professional speaker series is ideal for DJ and club applications. Easily transportable, high-power handling and heavy-duty construction characterize this series, which is available in 10, 12 or 15-inch formats. Designed to deliver deep, rich bass and clean, well-projected high frequencies, the **SP200** series is stringently tested to ensure long-term reliability. A heavy-duty and uniquely tapered cabinet shape eliminates standing waves and improves bass tonality, while the oversized woofer magnets handle high power and deliver full bass without distortion. Furthermore, the series is equipped with an auto-resetting protection circuit to protect the large voice-coil of the horn drivers.

**SECURE CONNECTION:**

A Neutrik plug is included with each speaker for a secure connection.

**FRONT PORTED CABINETS:**

Front-ported cabinets produce maximum bass output with the least distortion.

**HEAVY DUTY:**

Durable, splatter paint finish, metal corner braces and thick metal grills help protect speakers during transportation, which is made easy by recessed handles.

**SM27 PROFESSIONAL MONITOR**

The Spectrum **SM27** professional monitor is designed to deliver clean, crisp vocals. Featuring two 7" off-axis woofers and a Motorola tweeter, it easily covers large listening areas. Ideal for commercial applications, the drivers are protected by a heavy-duty metal grill and the cabinet is available in either a black, scratch-resistant structured vinyl or a grey, shock-resistant felt finish.

**STA01 TRIPOD STAND**

The collapsible and easy to transport STA01 is designed to securely hold professional loudspeakers. This heavy-duty tripod stand will support up to 79 lbs (36 kg) and is adjustable from 43" to 78" (109~198cm). Each stand also includes a head bracket for fast and safe mounting of any speaker not equipped with a post jack.
