

Black Silver

TLS1 TELESCOPIC LOUDSPEAKER STAND

The **TLS1** adjustable, telescopic system sets the speaker at the perfect listening height every time. A universal speaker mounting screw set is supplied with the stands to accommodate satellite speakers. Adjustable from 30" to 45" (76-155 cm), the elegant **TLS1** is compact, very stable and available in both black and silver.

TLS1:

The head of the universal plate accommodates most satellite speakers.
Hollow post permits cable concealment for an attractive presentation.
Weighted base provides extra stability.
Anti-skip rubber pad.

TLS3 TELESCOPIC LOUDSPEAKER STAND

The **TLS3**, with its unique horizontal or vertical mounting plate, will accommodate almost any small to medium-sized loudspeaker. Adjustable in height from 26" to 47.5" (67-120 cm), it features a convenient cable concealment system located inside the center post. The **TLS3** is supplied with adjustable spikes, and the hollow, low-profile base can be sand-filled for increased stability. Available in both black and silver.

TLS3:

A hollow post permits cable concealment for an attractive presentation.
Sand-filled base.
Multi-position head accommodates most small speakers.
Adjustable leveling spikes included.

Head accommodates most small speakers

Head designed for satellite speakers

Available in Black (add suffix 'N') and Silver (add suffix 'S')
