The new **INSPIRA** speaker series blends proprietary engineering with smooth, sleek styling to create exquisite sound.

The tall, slim and heavy cabinet design, with gently curved sides, minimizes sound wave breakup and results in a wide, deep and high soundstage image. To reduce distortion from cabinet flex, the rear-ported Inspira series is constructed of dense, internally braced and contoured MDF. As a result, the cleaner vocals and more impressive dynamic impact allow the series to roar and silence quickly.

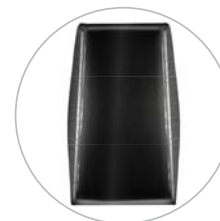

Matching drivers feature lightweight woofer and midrange cones with butyl rubber suspension and a magnetic fluid-injected titanium dome tweeter built into a unique dispersion setting. These components, specifically designed for the Inspira series, produce seamless coherent sound.

**GREAT COSMETICS:**

Both towers are adorned with a sleek and stable plinth. Gently curved sides frame a beautiful high gloss lacquered top and front baffle. Detailed edge contours soften and stylize the Inspira elegantly.

Continuous lacquered top, front & rear
