

Black Cherry Silver

The **ALTA** line is characterized by a thin and tapered cabinet geometry with a high-gloss, lacquered finish. The box design reduces standing waves, leaving the precision crafted woofers to reach their potential and deliver pure, well developed sound. With either the floor standing **AL51** tower with four 5.25" woofers, **AL41** plasma style with three 4" woofers, the **AL31** bookshelf or the **ALC** center, a balanced audio tonality is assured. Furthermore, the entire series is magnetically shielded and is equipped with tetetron tweeters and elaborate crossovers.

Choosing a stylish **ALTA** system is easy. Couple an **ALC** center channel with the **AL51** towers, the **AL41** plasma style speakers or the **AL31** satellite models for great sounding stereo and home theatre.

**A CLASSIC TOWER:**

The **AL51** features a plinth base as a stable and attractive support.

**PLASMA STYLE LCR:**

The **AL41** LCR (left/center/right/rear) is designed for wall mounting and integrates perfectly with plasma and LCD installations.

**FUNCTIONAL GEOMETRY:**

**ALTA** takes style and function to a new level . Slim, tapered cabinets and precision components ensure accurate sound reproduction, while high gloss panels bring style and sophistication to a new level.
