

metal - speaker stands

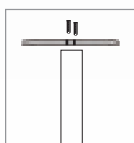

SS2 SERIES SPEAKER STANDS

Every loudspeaker's ability to produce music optimally is enhanced when a solid contact to the floor is established.

The Sonora SS1 and SS2 Series of metal speaker stands provides stability and prevents unnecessary vibrations or movement. The SS2 series, while similar to the SS1 series, features double posts to give increased stability for heavier loudspeakers. Both series come in three heights 23", 30", 42", making them ideal for all front and rear loudspeaker requirements.

SS2

EASY ASSEMBLY

Each post is secured into place using two screws on both the top and bottom plate, reducing assembly time to minutes.

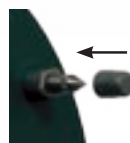

CABLE MANAGEMENT

Posts serve as cable management conduits.

ISOLATION PADS

All models are supplied with isolation pads, so that loudspeakers can be placed on a secure, non-slip, vibration-free surface.

CONVENIENT SPIKE CAPS

The SS1 and SS2 series features adjustable spikes for carpet applications, while convenient rubber spike caps protect wood floors.

Model	Height inches	Bottom Plate inches	Top Plate inches
SS2-23	23.0"	8.75" x 10.5"	5.0" x 6.5"
SS2-30	30.0"	8.75" x 10.5"	5.0" x 6.5"
SS2-42	42.0"	8.75" x 10.5"	5.0" x 6.5"
