

# LTA1

## Travel Adapter

The LTA1 is a compact, convenient travel adapter that can charge three devices at a time and works in over 150 countries across the globe. Three sections adapt to four different outlet configurations, and snap together into a single unit for easy storage and travel. High power output through two USB ports and an AC outlet makes it possible to do such things as power your notebook while charging your digital camera and mp3 player, all at the same time. The LTA1 features an On/Off switch, an overcharge inhibitor, a smart power status indicator and a fuse type overload protection. With the LTA1, you'll never have to worry about packing the right adapter, fumbling with clumsy travel kits, or running out of power just when you need it most.

Dual USB ports

On/Off switch with overcharge inhibitor

High power output

Fuse protection & extra fuse

LTA1

Power and charge up to 3 devices at once

Works in over 150 countries

- Input: AC 100-240V, 50-60Hz
- Output: AC 100-240V, 50-60Hz, USB 5VDC, 800mA
- The LTA1 does not convert power. Before using, ensure that your equipment is rated to handle both 100-120 and 220-250V standards.
