

DEG Series

Motorized Screen

DEG106

Daveco is pleased to introduce a motorized screen series of **cUL approved, remote controlled, and 12 volt triggered** screens.

To accommodate all types of installations, each model includes two remotes, namely, an **FM remote, an infrared remote** and a convenient **three position in line control**. All models are of a **16/9 aspect ratio** and feature an extra **wide top black band** so that the screen can be set lower and remain esthetically appealing.

Daveco's high quality screens are made of **glass fiber** material to display true and accurate colors, smooth imaging and wide angle uniform brightness. Each screen is coated with a washable surface and is rated at a **1:0 gain** ratio with a visual angle of 100 degrees.

Easy set-up is made possible with the included **wall or ceiling brackets** and a **20 foot long detachable power cord**.
