

LSF

Satellite Finder

LSF

The Livcon LSF satellite finder pinpoints the strongest satellite signal to help make precise dish set-up possible. With accurate sensors it will indicate as little as a 0.2 dB level difference through 950 to 2150 MHz band ranges and being equipped with 13 or 18V and 0Hz or 22 KHz led indicators, professional installations will be made easier than ever.

- Locates both analogue and digital signals
- Illuminated analogue display
- DB gain control
- 13 V and 18 V buzzer LED indicators
- 0 Hz and 22 kHz signal LED indicators
- 950-2150 mHz max input / 10 DBM
