HDMI OVER CAT5E / CAT6 EXTENSION BALUNS WITH IR

QHX3

Cost effective way to send HDMI signals over distances of up to 50 meters using one cat5e or cat6 cables

- 3D HD 1080p performance
- QHX3 baluns transmit HDMI signal over A single CAT5E / CAT6 for runs of up to 50 meters
- Integrated 20~60kHz bi-directional IR enables full remote control of a component in the transmission room from the signal destination room
- Support all formats of 3D, including 1080p (23.98/24 Hz), 720p (59.94/ 60/ 50 Hz) with bandwidth up to 165 mHz
- Supports LPCM uncompressed audio as well as DTS Digital and Dolby Digital compressed audio, including DTS-HD and Dolby True HD
- Video amplifier operating frequency: 165MHz / 1.65Gbps per channel bandwidth (4.95 Gbps all channels)

up to
50
Meters with cat5e or cat6

QHX3

For optimal performance use CAT6 Wire

Integrated IR enables full remote control of a component from room one to room two.
