

AE01 - Audio Envoy

High performance 2.4GHz wireless audio transmitter and receiver kit

- Sends and receives clear audio signals up to 50 meters using any standard music source.
- 2.4GHz-2.48GHz with 16 channel variable frequency to eliminate interference from other electronics.
- Easily connects to any audio source equipped with standard 1/8" mini-jack or RCA connection.
- High quality digital audio sampling rate of 44.1kHz, 16-bit
- Kit operates using a variety of convenient power sources. For constant fixed placement use the supplied AC power adaptor or the USB power supply cable. For on the go, use the long lasting built in lithium-ion "no memory" rechargeable batteries, that provides up to 6 hours of transmission at a time. Batteries can be charged while system is being used.
- Sleek compact design features "instant-on / auto-off" function to save battery power when not in use.

Audio Envoy kit includes:

- 1 x transmitter
- 1 x receiver
- 2 x 1/8" to 1/8" plug stereo audio cables
- 1 x 1/8" to two RCA converter cable
- 1 x USB to mini USB power supply cable
- 1 x AC power supply adaptor cable

AE01-CH

Extra AC power supply adaptor sold separately for continuous use of transmitter and receiver using AC power supply.
